

IRYNA ZHURAVLOVA

irene.zhuravlova@gmail.com | (646) 659-2884 | New York, New York

SUMMARY: I am passionate about creating technical solutions for complex business objectives

PROFESSIONAL EXPERIENCE

BLUECORE

Technical Program Manager

New York, NY

February 2020–Present

- Implemented data integration pipeline between Jira, Salesforce, BigQuery and Looker to generate a high-performance data warehouse to help development teams plan and manage agile and software projects using powerful analytics and BI tools
- Executed automation projects to reduce deployment process and ticket lifecycle time for a team of 15 Integration Engineers
- Identified and executed new innovative programs using agile development processes to adjust scalability and quality
- Coordinated ongoing technical communication and issue management with enterprise clients to design integration solution options, level of effort sizing and classified potential risks

EYEVUEVIEW (acquired by Aki Technologies)

Technical Project/ Program Manager

New York, NY

March 2019–January 2020

- Increased performance of 4 cross-functional scrum teams by managing sprints, ensuring roadmap delivery
- Anticipated bottlenecks, managed risks and escalations to balance tradeoffs between business needs and technical constraints
- Defined technical roadmap and established strategies by partnering with business stakeholders and product owners
- Effectively prioritized engineering tasks/features based on the level-of-effort vs impact and other trade-offs

VIRTUAL HEALTH

Technical Project Manager

New York, NY

March 2018–March 2019

- Managed development process of 65 engineers to ensure quality execution and predictability in schedule and budget
- Improved the Software Release Management by establishing a regular release cycle for 14 instances and setting up the new infrastructure with DevOps
- Communicated with senior leadership, internal and external stakeholders on program progress and risks

HAUTECH LTD

Product Manager

Kiev, Ukraine

January 2016–March 2018

- Managed an e-commerce product from planning to launch, served as a product owner for a cross-functional scrum team
- Defined, monitored and analyzed KPIs, conversion metrics and A/B tests to support continual optimization of the product
- Led front-end development of a cross-platform and cross-browser product: Django, ReactJS, GCP, Balsamiq Mock-ups
- Managed product/feature backlog while driving the roadmap planning to ensure the strong focus on metrics and KPIs

SLOVIS LLC

Product Manager

Kiev, Ukraine

September 2013 -December 2015

- Launched 4 new technical products and increased the revenue by 105% overall over the course of 3 years
- Performed a transition of company's business model from B2C to B2B&B2C, launching SaaS products
- Developed business requirements, functional details for new features and products throughout their lifecycle

Project Manager

September 2012–August 2013

- Coordinated strategic project work across Product, Engineering and Customer Success teams
- Led large-scale, company-wide projects through planning, development, stabilization and debriefs

Junior FrontEnd Developer

March 2010–September 2012

- Developed client side side visualization for UI driven products using Angular, PHP (Yii2), HTML, Javascript & jQuery
- Designed web components with responsive layout to ensure web applications are rendered consistently across browser environment and optimized for mobile
